ECoS LAUNCHES TWO ONLINE APPLICATIONS FOR THE PUBLIC: EEISy AND Talk2ECoS

KOTA KINABALU, 25 September - The Energy Commission of Sabah (ECoS) has launched two online applications, the ECoS Energy Information System (EEISy) and Talk2ECoS.

EEISy is an online platform specifically designed to facilitate the registration process as an ECoS Electrical Energy Manager (EREEM) and ECoS Energy Service Company (EESCO) for energy efficiency-related services.

"This system not only enhances operational efficiency but also ensures the orderly management and easy access of data for all parties involved," said Datuk Ir. Abdul Nasser Abdul Wahid, Chief Executive Officer of ECoS, during his speech at the EEISy and Talk2ECoS online system launch ceremony held at Hyatt Centric Kota Kinabalu today.

He also explained that the information submitted by EESCO through the EEISy system is crucial for identifying and monitoring energy usage by industries or large energy consumers in Sabah. The same information will also assist in ECoS's subsequent initiative, the development of the Sabah Energy Efficiency Action Plan (SEEAP), which is one of the strategies in the Sabah Energy Roadmap and Masterplan 2040 in the near future.

"EESCO plays a vital role in the implementation of energy audits and providing consultancy services to commercial and industrial premises towards more efficient electrical energy management. ECoS aims to register at least 10 EESCOs this year to provide effective services to nearly 70 premises requiring their services in the state of Sabah so far," he added.

Meanwhile, the launch of Talk2ECOS is an initiative introduced by ECoS to establish a feedback management platform that includes complaints, inquiries, and suggestions. By introducing this platform, ECoS will be able to monitor any information received for further action, especially those that are still pending and require attention at the level of the energy supply service licence holders in this State.

About ECoS

The Energy Commission of Sabah (ECoS) is a statutory body established by the State Government of Sabah since 10th January 2023. It operates as the regulator for the energy sector within the Chief Minister's portfolio. The primary objectives of ECoS are to ensure secure, sustainable, affordable, and accessible energy for the State of Sabah. ECoS plays a pivotal role in shaping Sabah's energy landscape, promoting responsible energy practices, and safeguarding the interests of both consumers and the environment.

"The launch of the EEISy app and Talk2ECoS today is one of the digitisation initiatives that can benefit many parties in line with ECoS' role to facilitate the needs of stakeholders in particular and the community in general," he explained, adding

that this initiative is proof of ECoS's dedication towards achieving the Sabah Energy Roadmap and Masterplan 2040 (SE-RAMP 2040) vision.

"We are committed and value every piece of information received and will take the appropriate action for each constructive feedback and suggestion. Through this collaboration, we are confident that both applications will become significant platforms in creating a chain of communication and collaboration between ECoS and the community," said Datuk Nasser.
